# ConstructionOnline Basics™

## Discover construction software designed to save you time and money.

# ConstructionOnline™ Basics

Discover ConstructionOnline Basics - powerful yet easy-to-use software tools designed for better project management, estimating, scheduling and much more.

# The Right Tools for the Job.

With ConstructionOnline Basics working for you, you'll save time and money by giving your team the tools they need to succeed.
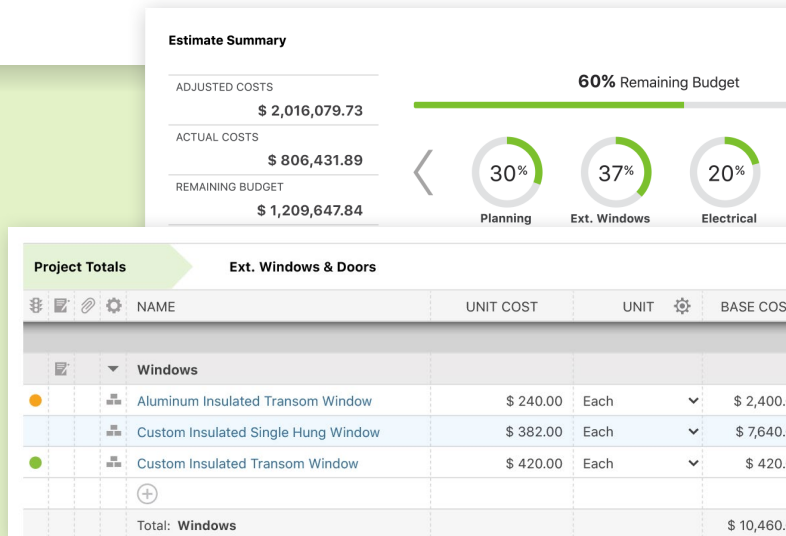

## Core Tools

### Your foundation for success.

Get access to the tools your team needs to build a foundation of success. Best of all, Core Tools are free for every user—forever!

## OnCost™ Estimating

### Powerful project estimating.

Every great project starts with a great estimate. OnCost Estimating gives you the power to create accurate, detailed construction estimates in minutes.

## ConstructionOnline™ LT

### The all-in-one platform for project management.

Get even more control and visibility for your projects with integrated PM tools designed to maximize efficiency and reduce errors.

3

# Your bedrock for better projects.

Just like any new build, starting with a stable foundation is key. Core Tools provide the solutions you need for better task management, file storage, communication and more.

## What's included in Core Tools:

### File Storage & Sharing
Upload and share plans, photos, PDFs and other documents for all of your projects.

### To Do Lists
Manage daily construction tasks with flexible, dynamic to do lists.

### Construction Calendars
Keep everyone up-to-date with the latest project events and deadlines.

### Planroom & Markup
Upload project plans, add markup &  notes to easily share with your project teams.

### Company Directory
Store all of your resources' contact info in a centralized location.

### Messaging & Chat
Keep all of your project communication in one place for easy reference.

# Minimize risks, maximize profits.

OnCost Estimating gives you the power to create accurate, detailed estimates in minutes.
Protect your bottom line by managing costs, quantities, margins and more with ease.

## What's included in OnCost™ Estimating

**All Core Tools, plus:**

### Construction Estimating
Control costs and protect profits with powerful yet easy-to-use estimating

### Proposals
Win more jobs over your competition with professional proposals

### Contracts
Get it in writing and protect your business with detailed contracts

### Reporting & Dashboards
See insights from your project data with visual dashboards

### Client Selections
Give clients the power to choose fixtures, finishes, upgrades and more

### Invoicing
Create invoices directly from estimates and selections and record payments

# Get even more control over financials.

Supercharge your estimating and financials with centralized company costbooks, advanced change order management and industry-leading accounting integration.

## What's included in OnCost™ Estimating Plus

**All OnCost Estimating Tools, plus:**

### Company Costbooks
Create accurate estimates even faster with centralized, up-to-date cost data

### Change Order Management
Create & track detailed change orders and protect your bottom line

### QuickBooks® Online Integration
Get accurate, real-time accounting with bi-directional integration

# Pull it all together.

ConstructionOnline LT integrates foundational tools and estimating with advanced PM solutions like gantt-chart scheduling, daily logging, punch lists and more for the ultimate all-in-one platform.

## What's included in ConstructionOnline™ LT

**All OnCost Estimating Plus Tools, and:**

### OnPlan™ Scheduling
Keep jobs on time and on target with powerful, flexible scheduling software

### Daily Logging
Document project activity - including delays, accidents and work performed

### Punch Lists & Checklists
Record and correct any deficiencies for smooth project close-outs

### Client & Subcontractor Logins
Give clients and subs access to critical project documents, events, tasks & more
